

CITY OF PATERSON

Office of Emergency Management

HEAT ADVISORY

MAY 21 - 22, 2022

The City of Paterson Office of Emergency Management would like to inform the residents of Paterson that we are expecting temperatures to reach as high as 95 degrees this weekend. Stay hydrated by drinking plenty of water, wearing light colored and light material clothing, avoid going outside when the sun is at its hottest, staying indoors in a cool area like the mall and library. Most importantly do not do strenuous activities outdoors. Always remember NEVER LEAVE CHILDREN AND ANIMALS IN A HOT CAR. This can be very dangerous and even fatal. Check on your family and friends, especially the elderly and physically disabled. Learn valuable information on how to prepare and stay safe during extreme heat events by visiting any of the following websites:
