

ATTENTION!

A new species of mosquito is spreading throughout New Jersey.
It may be in your backyard, on your deck, or on your balcony.

Asian tiger mosquito (*Aedes albopictus*)

ARE YOU...

- bitten mainly in the daytime?
- bitten mostly in shaded areas of your property?
- often bitten on the feet, ankles, or lower legs?
- bitten by small (about ¼") black mosquitoes with ***bright white stripes*** on the legs, back and head?

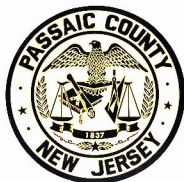

If you answered yes to most of these questions you probably have Asian tiger mosquitoes in your neighborhood.

Dump standing water to destroy mosquito habitat !

Check for containers like:

- Old tires
- Buckets
- Wading Pools
- Toys
- Watering Cans
- Pet Dishes
- Bird Baths
- Plastic Tarps
- Flower Pots
