STAGNANT WATER COMPLAINTS ARE BEING INVESTIGATED
AND PREVENTION IS KEY!**

WHAT IS WEST NILE VIRUS?

- ◆ Occurs in late summer or early fall, but can be year-round in milder climates
- ◆ Viral disease spread by mosquitoes that feed on wild infected birds
- ◆ Not transmitted person to person
- ◆ Often causes no symptoms, or flu like symptoms such as fever, headache, body aches, swollen lymph glands
- ◆ Can cause inflammation of the brain (encephalitis) and of the spinal cord (meningitis), usually of the elderly, infant or immunosuppressed patients
- ◆ Can infect horses and occasionally other small mammals

Prevention is targeted by mosquito control and addressing the habitats where they like to breed:

Dump standing water in containers such as, tires, buckets, wading pools,

Community Development

WHAT DOES BEING SAFE IN YOUR NEIGHBORHOOD MEAN TO YOU?

Drug-free zones around schools offer communities one way to give students a place where they can play and talk without being threatened by drug dealers and drug users. Federal law and many state and local laws increase penalties for drug-related activities in drug-free school zones. It is a law and a community-wide commitment to reduce drug use among young people. For more information call **Ms. Nancy Grier at 973-321-1212 ext. 2233**.
